### **EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE**

This communication is an Examiner's reasons for allowance in response to application filed on 03/10/2004, assigned serial 10/797,407 and titled "Occupant classification method based on seated weight measurement"

The following is the Examiner's statement of reasons for the indication of allowable subject matter:

After carefully searching variety of classification areas that are relevant to the subject matter of claimed invention, the examiner has found none of the reference teach the limitations as claimed. None of the prior art teach a method of classifying an occupant of a motor vehicle seat, comprising: measuring and sampling a seated weight of the occupant to form a primary data set including an average weight, an average standard deviation of said average weight, and an average longitudinal center-of-mass of the occupant; classifying the occupant as a forward-facing child seat if: (1) said initial period of weight measurement stability is detected, and (2) the average weight during said initial period does not exceed a child seat threshold, and (3) the average longitudinal center-of-mass during said initial period is rearward of a reference point; classifying the occupant as a rearward-facing child seat if: (1) said initial period of weight measurement stability is detected, and (2) the average weight during said initial period does not exceed a child seat threshold, and (3) the average longitudinal center-of-mass during said initial period is forward of said reference point.
